

We are Jolex.

Together, we get things done.

Jolex Building and Civil specialise in civil construction, concrete, formwork and drainage. We work with building contractors and developers to deliver ground works for civil infrastructure projects, commercial projects and residential developments across Queensland and beyond.

Jolex was founded in 2013 to bring our 20+ years' experience in building, civil construction and project management under one roof.

We share our industry's commitment to safety and quality assurance and have established a reputation as providers of flexible and commercial solutions supported by a reliable team and supplier network.

Services.

- Civil earthworks

Why work with us?

Commercial solutions

The Jolex philosophy is to match quality construction with commercial intelligence, working with client teams to ensure all aspects of projects run to the required safety standards, job specifications, timing and budget.

Skilled, reliable workforce

All jobs succeed through teamwork. Our diverse team brings together multiple skilled trades to deliver a complete civil package. Our experience working across a range of projects – from large civil works to managing our own developments – has given our team unique insight to how successful projects are run.

Strong relationships

Our reputation relies on our ability to deliver – so that's what we do. Jolex is committed to going the extra mile to ensure the success of each project. Clients value our transparency and attention to detail in all aspects of job pricing, resourcing and project management.

Who we work for

Recently completed projects include work for:

- Building contractors and developers – Tier 1 and Tier 2
- Commercial developers
- Residential builders and developers
- Road and rail infrastructure projects
- Defense industry and security projects
- Locations across Brisbane, Gold Coast, Queensland and interstate

Our history

Jolex Building and Civil was founded in 2013 by Alexis and Josh Badman to bring our 20+ years' experience in building, civil construction and project management under one team. **Together, we get things done.**

Josh Badman, Construction Manager

Josh is Jolex's highly experienced Construction Manager. His background in residential, commercial and civil construction helps him build high performing teams to tackle all types of civil construction and infrastructure works.

Alexis Badman, Operations Manager

Alexis is Jolex's Operations Manager. Her experience as a project manager gives her unique insight to how successful projects are run. She is highly commercial and client focused.
